Digestion control

Specially dietary fibres and highly digestible ingredients regulate digestion and reduce the amount of faeces.

Optimal development

Valuable fatty acids from salmon support brain development. L-carnithin and valuable protein support an athletic body development. Taurin and L-Carnithin are important nutrients for the heart.

Skeletal development

A well balanced calcium-phosphor-ratio, vitamin C, as well as manganese and copper support strong bone development and healthy joints.

*Please note that the recommended amounts are guidelines and need to be adjusted to the dog's individual needs. The recommended amounts are based on the weight of the adult dog. During growth a moderate growth rate based on the correct energy supply is ideal. If your dog is too big and too heavy, it is recommended to reduce the feed intake. An adequate supply of nutrients is assured even in smaller portions. Please make sure that your dog always has free access to fresh drinking water.
